Bloom Communication / Promideea Group
Bucharest / Romania
2019 - 2020
- Graphic designer / Advertising agency
Brandaffair agency , Bloom Communication
2016 - 2019

I am an Environment Artist with experience in AAA game development, graphic design and visual storytelling. I specialize in creating immersive environments, combining level art, set dressing, prop creation and technical workflows to build believable worlds that support gameplay and narrative. I enjoy collaborating with multidisciplinary teams, solving visual challenges and transforming concepts into polished player experiences.

MAFIA - THE OLD COUNTRY

LATEST PROJECT

LEVEL ARTIST / PROP ARTIST

Contributed to the development of Mafia: The Old Country as a Level Artist, collaborating closely with the Hangar 13 team to create authentic and immersive gameplay spaces.

My primary focus was Level Art and Set Dressing, where I was responsible for shaping visually compelling environments while maintaining gameplay readability, historical authenticity and technical performance requirements.

Key responsibilities

- Created and polished level art for major locations such as Tannery, Train Station, Brothel and other mission-critical environments.
- Performed extensive set dressing, bringing environments to life through composition, storytelling and environmental detail.
- Worked with building generators and modular workflows to efficiently assemble large-scale environments.
- Created and integrated environment props when required, supporting the overall visual quality of the levels.
- Collaborated daily with the Hangar 13 team, aligning artistic direction, gameplay needs and production constraints.
- Participated in iterative feedback cycles, implementing improvements based on team reviews and project requirements.
- Ensured environments met both artistic and technical standards while maintaining performance targets.
